Abstract

My ongoing internship at **Vivnovation,** ***Innovation Iterate Intensely*** a forward-thinking healthcare innovation company, serves as the parent organization of Doctor Alliance which began on 4th April 2025, provides a robust, multidisciplinary journey at the intersection of healthcare technology, business innovation, and strategic growth. With a mission to transform healthcare delivery and empower independent providers, Vivnovation leverages data-driven strategies, operational expertise, and market insight. Doctor Alliance, under its umbrella, focuses on strengthening community-based care by supporting physicians through strategic outreach, practice growth, and value-based care initiatives. Together, they are driving sustainable transformation across the healthcare landscape

Building on more than a decade of industry experience, Doctor Alliance leverages a dual strategy of excellent client service and account-based marketing to secure its niche in the U.S. healthcare market, with the ambitious target of achieving unicorn status. My active participation in projects has immersed me in the complexities of the U.S. healthcare system, bridging operational gaps between physician groups and agencies, and supporting the optimization of revenue capture.
The 10-day offsite training in Mysore has further enriched my technical expertise, collaborative abilities, and alignment with organizational values. The hands-on experience, exposure to strategic operations, and mentorship I receive are equipping me with both professional and personal growth, laying a strong foundation for my future career in health technology and business transformation.

Throughout my internship, I am acquiring critical skills in project management, workflow design, business process reviews, and revenue cycle management, while gaining meaningful insights into American business culture and relationship-building. My contributions include recommending automation and process optimization for the back office, standardizing handovers, and advocating for structured meetings—all aimed at enhancing operational efficiency and supporting Doctor Alliance's growth strategy.

1. Introduction

1.1. Overview of Internship and Organization

My internship at **Vivnovation is a Multi- disciplinary role**, the parent company of **Doctor Alliance**, offers a hands-on experience in healthcare technology and innovation. Doctor Alliance, based in the U.S., specializes in optimizing documentation workflows between home healthcare agencies and physician groups. The company focuses on improving revenue capture and reducing administrative inefficiencies, thereby enhancing the healthcare delivery process.

1.2. Role and Work Culture

My role has evolved into supporting growth-focused projects. The culture at Doctor Alliance is dynamic and fast-paced, promoting continuous learning and real-world engagement. I've been actively involved in recommending process optimizations, standardizing handovers, and advocating for structured meetings to enhance operational efficiency.

1.3. Organizational Strategy and Growth

Doctor Alliance adopts a dual-division strategy—one focused on exceptional client service and the other on growth through account-based marketing. With the goal of achieving unicorn status by 2025, the company is strategically expanding into new divisions aligned with quarterly targets and long-term objectives.

1.4. Company Culture and Values

At the core of Doctor Alliance is based entirely on American Affinity. The workplace culture is grounded in open communication, mutual respect, and inclusiveness. These values create an environment of psychological safety, encourage the free exchange of ideas, and attract talent

globally, which is crucial for a company that aspires to both U.S. and international market expansion.

1.5. Personal Growth Opportunities and Industry Relevance

As digital transformation accelerates in healthcare, Doctor Alliance's solutions are crucial in reducing administrative overload and enabling providers to focus on patient care. I've gained skills in workflow design, stakeholder communication, and team collaboration, particularly through leadership engagement and networking.

2. Scope of the Project

2.1. Market Penetration in Divisions of United States

The U.S. healthcare market, valued over $4.3 trillion, faces challenges in fragmented care delivery and inefficient documentation. Doctor Alliance addresses these issues by streamlining administrative functions and fostering collaboration between physician groups and HHAs.

2.2. Navigating Healthcare Intricacies with Doctor Alliance

Patients engage with the healthcare system via hospitals, clinics, or home visits. Each route involves EHR-based documentation and physician evaluations. However, inefficiencies and documentation gaps during transitions to HHA services pose significant obstacles.

2.3. Obstacles in the Healthcare Documentation Process

1. **Physician Involvement in Documentation:**
    a. Physicians are technically required to review the 485 CERTS, along with other documents such as physical or verbal notes, medical tests, and the Plan of Care
    b. However, these tasks are often overlooked by physicians due to their non-revenue- generating nature.

2. **Impact on Billing Processes:**
    a. Due to oversight by physicians, delays and complications arise in the billing process for HHA services.
    b. This creates billing challenges for both physicians and HHAs, impacting revenue streams and overall efficiency.

2.4. Pain Points for Stakeholders

1. **Physician Perspective:**
    a. Dealing with a large volume of documentation, including 485 CERTs and associated paperwork.
    b. Balancing revenue-generating tasks with administrative duties, leading to potential oversights in documentation review.

2. **HHA Perspective:**
    a. Facing billing challenges due to incomplete or delayed documentation from physicians.
    b. Struggling to bill for services rendered, impacting revenue and overall financial health of the agency.

3. Methodology/Approach

3.1. Target Groups

- Physician Groups: Bill for care oversight (30+ minutes per patient per 60-day cycle).
- Home Healthcare Agencies (HHA): Share patient documents to support physician billing.
- Physician Role: Review documents, create care plans (e.g., 3 nurse & 2 physio visits/60 days).

3.2. Decoding the Business Model

- Data Flow: HHAs onboard → documents sent to physician groups → Doctor Alliance gains access.
- EHR Access: DA connects with physician groups to study patient details.
- Support: DA assists with documentation to ensure oversight compliance and revenue capture.

3.3. Growth Model of Doctor Alliance

- Document signing within 1 day (e.g., 485 CERT, F2F).
- Oversight validation and CPO documentation.
- Platform-based document verification.
- Streamlining Documentation: Simplifies and streamlines document submissions from home health care agencies, reducing administrative burdens and enhancing efficiency.
- Physician Revenue Capture: Facilitates efficient billing processes for physicians, ensuring accurate capture of billing codes such as G0180, G0179, and G0181.

4. Tools and Technology

4.1. Electronic Signature Platforms

DocuSign / HelloSign – For enabling fast, secure, and compliant digital signing of physician documents such as 485s, face-to-face forms, and certifications.

4.2. Workflow & Document Management

Google Workspace (Docs, Sheets, Drive) – For collaborative documentation, real-time tracking, and cloud-based record-keeping.

4.3. Electronic Signature Platforms

Internal CRM/Workflow Tools – Custom platforms or tools for managing documentation pipelines, tracking pending signatures, and organizing episode-level data.

4.4. Communication & Collaboration

Slack / Microsoft Teams – For internal team coordination, cross-department updates, and real-time communication across time zones.

Zoom / Google Meet – For virtual meetings, physician onboarding sessions, and HHA-client interactions.

4.5. Task & Project Management

Trello / Asana / ClickUp – Used to assign, track, and manage documentation tasks, physician follow-ups, and HHA workflows.

4.6. Analytics & Reporting

Google Sheets / Excel Dashboards – For tracking performance metrics, turn-around times, and episode billing status.

Data visualization tools – Used for internal performance tracking and quarterly reviews.

5. Project Plan

5.1. Vision

- To ensure timely and accurate processing of medical documents, making patient episodes billable and capturing lost revenue.
- To innovate and iterate the documentation process to ease the administrative burden on healthcare providers.
- Understand coordination between physician groups and HHAs.

5.2. Mission

- To provide efficient and comprehensive documentation solutions that streamline the workflow for home healthcare agencies and physician groups.
- To ensure timely and accurate processing of medical documents, making patient episodes billable and capturing lost revenue.

5.3. Goals

- Support data-driven oversight and planning to align performance goals across physician networks.
- Streamline documentation workflows to reduce administrative delays.
- To enhance cash flow for healthcare agencies and physicians by ensuring patient episodes are billable.

6. Expected Outcome/s

- **Operational Efficiency:** Improved documentation turnaround time, reducing delays in patient episode billing.
- **Revenue Optimization:** Helped identify unbilled patient episodes, increasing cash flow for physician groups and HHAs.
- **Scalable Growth Model:** Contributed insights to support Doctor Alliance's expansion into new regions with structured planning.
- **System Integration**: Ensuring seamless integration between different software systems used in the back office to improve data flow and reduce redundancies.
- **Professional Growth:** Gained hands-on experience in healthcare operations, data interpretation, and team collaboration in a real-world setting.
